Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

TECHNICAL REPORTS VOLUME 8-10

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: .on either side to form cofferdams. An 8-in. unwatering pump was sufficient to control the seepage. After the excavation had been finished, except for what hand work was necessary, the dragline drove the row of timber piles in the same manner as had been described for similar work at the Black Street bridge. The steel sheet piling along the upper toe was then driven as illustrated in Fig 11. In this view the first section of the dam had been completed, the cofferdams removed (by dragline), and the flow of the river turned through the five gaps in that section of the dam left for that purpose. The progress in driving the round piles was about the same as that made at the Black Street bridge. An average day s work for the driving of sheet piles was about 30 pieces per 10-hour shift, 8 to 12 feet penetration. Plant Erection. In numerous cases a dragline machine has been used in place of a crane or derrick for the erection of larger machines or other construction plant. At one point three dragline machines were to be set up, one small one and two larger ones. The small one was erected with the help of gin poles, and was immediately put into service for erection of the two larger machines. This small machine was a Model 36 Marion on caterpillar traction, and was most useful in the erection of the two larger machines, saving greatly in both...
