By Thomason Civil Engineering College

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 110 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: . . . arms, AB and AO, of the instrument. The Eidograph, which is represented in the accompanying engraving, (Fig. 85,) is a far superior instrument to the pantagraph, being more exact in its work, and not so limited as regards ratio of reduction. The point of support when the instrument is at work is a heavy weight shown at H, from the under side of which three or four projecting needle points fix the instrument firmly to the drawing paper. Springing from this weight is a short standard or fulcrum, attached to a sliding-box, K, in which slides the centre beam, C, and to any part of which it may be clamped by means of a clamping screw. At the ends of the central beam are two pulley wheels, JJ, the centre pins of which revolve in sockets at the ends of the beam. Two steel bands,...
