In part, these consist of estimates based upon incomplete returns secured in statistical and other studies of the industries. The only complete data available on the consumption of wood for packages are total figures which include the material from which all three types are manufactured. This total of 300,000,000 board feet, including 3 and 5 ply as well as single-ply veneer containers, is equivalent toabout 1,500,000,000 square feet of box shook, on the assumption that veneer...
